T. MATTFELDT and G. MALL. Estimation of length and surface of anisotropic capillaries 181

A. D. ROMIG, JR. Quantitative X-ray microanalysis of uranium alloys with the analytical electron microscope 191

RONALD R. WARNER. Gallium: a new supporting medium for specimen preparation 203

Short Technical Note

MARGARET S. BURNS. Selection of calcium isotopes for secondary ion mass spectrometric analysis of biological material 209

Part 3

R. C. POND. Review of the principal contrast effects observed at interphase boundaries using transmission electron microscopy 213

W. E. VOICE and R. G. FAULKNER. Accurate method of measuring grain misorientations and analysing grain boundary planes in TEM 241

M. LESNIAK, B. A. UNVALA and D. B. HOLT. An improved detection system for electrical microcharacterization in a scanning electron microscope 255

D. K. HAMILTON, C. J. R. SHEPPARD and T. WILSON. Improved imaging of phase gradients in scanning optical microscopy 275

S. KRITZINGER and C. L. CHURMS. Facility for rapid preparation of silicon and silicide TEM specimens 287

THIERRY PUN, JAMES R. ELLIS and MURRAY EDEN. Optimized acquisition parameters and statistical detection limit in quantitative EELS 295

C. STOLISNKI, L. LANDMANN and H. ABT. Design and application of a freeze-fracture stage with a cleaver device for Balzers 'freeze-etching' apparatus 317

JOSTEIN HALGUNSET. Stereological estimation of average cell volume in monolayer culture by combined light and electron microscopy 325

T. M. MAYHEW. Geometric model of the rat intestinal mucosa for stereological evaluation of villus amplification factors 337

R. FEDER, J. S. PEARLMAN, J. C. RIORDAN and J. L. COSTA. Flash X-ray microscopy with a gas jet plasma source 347
